

Food Contact

Marpet-gfs – Food Approval Certification

The composition of the resins used for the extrusion of pet-g plastics are in accordance with the European regulation, including Commission Directive 2002/72/EC and its subsequent amendments 2004/1/C, 2004/19/EC, 2007/19/EC, 2008/39/EC for plastics used in food-contact applications.

The co-polyester resins also comply with the compositional requirements of the US Food and Drug Administration regulation (FDA) 21.CFR 177.1315 (April 1, 1995).

It is the responsibility of the end user to satisfy himself that the product is fit for purpose and meets the approved migration standards for the application

Brett Martin Ltd. pursues a policy of continuous product development and reserves the right to amend specifications without notice.
